## NOTICE OF DUTY OF DISCLOSURE

### IMPORTANT

#### Duty of Disclosure (Rule 56)

**It is mandatory that information of which you are aware or become aware of during the prosecution of the application up until issuance of a patent and which is "Material to patentability" be disclosed to the PTO ( Information Disclosure Statement (IDS)). Submission of such information is necessary to comply with the rules of the Patent and Trademark Office (PTO) and to lessen the likelihood of attacks, in any subsequent litigation, on the validity or enforceability of the patent on the ground of "inequitable conduct". Information which must be submitted includes not only printed publications but also offers for sale and public uses of the invention in the U.S. more than one year prior to the U.S. filing date. The PTO considers information material to patentability:**

- "...when it is not cumulative to information already of record or being made of record in the application, and
- (1) it establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) it refutes or is inconsistent with, a position the applicant takes in:
  - (i) opposing an argument of unpatentability relied on by the office, or
  - (ii) asserting an argument of patentability.

A **prima facie case of unpatentability** is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in any attempt to establish a contrary conclusion of patentability."

If the materiality of the information is not clear, please send it to us, as soon as possible after its discovery, for our evaluation. The filing of an IDS shall not be considered in any way to be an admission that the information is or is considered to be material to patentability.

#### Timing

To minimize the necessity of paying fees in order to have such information considered by the PTO, we strongly advise you to:

- (a) send all known material information to us at the latest 1 month after a new application is filed;
- (b) send all material information to us at the latest 1 month after it is first discovered by a person having a duty of disclosure under the rule (the latter are inventors, attorneys or agents prosecuting the application and associates of the inventors or assignees involved with the application); and
- (c) send a copy of the search report in a counterpart foreign application and all references cited therein (or preferably English language equivalents thereof) to us at the latest 1 month after its mailing date from the foreign patent office.

In case (b) above, inform us of the date on which the information first came to the attention of a person having a duty of disclosure. In case (c), inform us of the mailing date from the foreign patent office of such communication.

#### Non-English Language References

Non-English language references will not be considered by the PTO unless:

- (1) an English language equivalent or translation is provided,
- (2) an individual associated with the filing of the application and most knowledgeable about the content of the reference provides a concise explanation of its relevance, to the best of his/her knowledge; a concise explanation may be provided by pointing out and providing a translation of the pertinent portions of the reference, or
- (3) the information was cited in a search report by a foreign patent office and an English language version or translation of the search report indicating the relevance of the reference is submitted.

To minimize questions of validity based on a non-English language reference, option (1) is preferable, especially if the invention is of commercial importance. While proceeding under option (2) or (3) may be sufficient to comply with the Rule, any resultant presumption of validity over the non-English language reference(s) may be overcome in litigation, e.g., if the explanation is shown to be inaccurate or incomplete. Also, we foresee that explanations under option (2) may be challenged in litigation on the ground that they were not made by "the person most knowledgeable".

**THE DUTY OF DISCLOSURE APPLIES TO ALL INDIVIDUALS SUBSTANTIVELY INVOLVED IN THE PREPARATION OR PROSECUTION OF THE APPLICATION.**

**THE DUTY IS A CONTINUING OBLIGATION WHICH DOES NOT CEASE UNTIL THE PATENT IS GRANTED.**

## NOTICE OF DUTY OF DISCLOSURE IMPORTANT

### Duty of Disclosure (Rule 56)

It is mandatory that information of which you are aware or become aware of during the prosecution of the application up until issuance of a patent and which is "Material to patentability" be disclosed to the PTO (Information Disclosure Statement (IDS)). Submission of such information is necessary to comply with the rules of the Patent and Trademark Office (PTO) and to lessen the likelihood of attacks, in any subsequent litigation, on the validity or enforceability of the patent on the ground of "inequitable conduct" information which must be submitted includes not only printed publications but also offers for sale and public uses of the invention in the U.S. more than one year prior to the U.S. filing date. The PTO considers information material to patentability.

- "...when it is not cumulative to information already of record or being made of record in the application, and
- (1) it establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
  - (2) it refutes or is inconsistent with, a position the applicant takes in:
    - (i) opposing an argument of unpatentability relied on by the office, or
    - (ii) asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in any attempt to establish a contrary conclusion of patentability."

If the materiality of the information is not clear, please send it to us, as soon as possible after its discovery, for our evaluation. The filing of an IDS shall not be considered in any way to be an admission that the information is or is considered to be material to patentability.

### Timing

To minimize the necessity of paying fees in order to have such information considered by the PTO, we strongly advise you to:

- (a) send all known material information to us at the latest 1 month after a new application is filed;
- (b) send all material information to us at the latest 1 month after it is first discovered by a person having a duty of disclosure under the rule (the latter are inventors, attorneys or agents prosecuting the application and associates of the inventors or assignees involved with the application); and
- (c) send a copy of the search report in a counterpart foreign application and all references cited therein (or preferably English language equivalents thereof) to us at the latest 1 month after its mailing date from the foreign patent office.

In case (b) above, inform us of the date on which the information first came to the attention of a person having a duty of disclosure. In case (c), inform us of the mailing date from the foreign patent office of such communication.

### Non-English Language References

Non-English language references will not be considered by the PTO unless:

- (1) an English language equivalent or translation is provided,
- (2) an individual associated with the filing of the application and most knowledgeable about the content of the reference provides a concise explanation of its relevance, to the best of his/her knowledge; a concise explanation may be provided by pointing out and providing a translation of the pertinent portions of the reference, or
- (3) the information was cited in a search report by a foreign patent office and an English language version or translation of the search report indicating the relevance of the reference is submitted.

To minimize questions of validity based on a non-English language reference, option (1) is preferable, especially if the invention is of commercial importance. While proceeding under option (2) or (3) may be sufficient to comply with the Rule, any resultant presumption of validity over the non-English language reference(s) may be overcome in litigation, e.g., if the explanation is shown to be inaccurate or incomplete. Also, we foresee that explanations under option (2) may be challenged in litigation on the ground that they were not made by "the person most knowledgeable".

**THE DUTY OF DISCLOSURE APPLIES TO ALL INDIVIDUALS SUBSTANTIALLY INVOLVED IN THE PREPARATION OR PROSECUTION OF THE APPLICATION.**

**THE DUTY IS A CONTINUING OBLIGATION WHICH DOES NOT CEASE UNTIL THE PATENT IS GRANTED.**
